# *Employment history*

## Roche Malaysia, Sr.Full Stack Developer/Lead Developer     July 2021 – Present

- Developed multiple webapps using JS, ExpressJS, Java, Spring Boot, React, NextJS, Angular, MySQL, and AEM.
- Implemented SSO with AWS Cognito, enabling Google and Facebook sign-ins.
- Worked as a Full Stack Developer, integrating front-end UI with APIs.
- Possesses excellent communication and teamwork skills.
- Proficient in troubleshooting, debugging, and upgrading software.
- Writes clean, functional code for both front and back-end.
- Assists in enhancing existing software components and adding new features.
- Provides guidance and support to team members.
- Conducts code reviews to ensure correctness and maintainability.

## DHL, Full Stack Developer (Freelancer)     July 2022 - July2023

- Developed web applications using JavaScript, NodeJS, Angular, and Bootstrap.
- Ensured Angular project remained up-to-date and upgraded application from version 8 to 14.
- Participated in the design and creation of scalable software.
- Tested, fixed bugs, and addressed performance issues.
- Collaborated with the engineering team to design and launch new features.

## PCCW Solutions, Full Stack Developer     July 2020 – July 2021

- Developed and supported web application using Java, J2EE, Spring Boot, NodeJS & Angular.
- Participated in designing and creating scalable software.
- Wrote clean, functional code for both front- and back-end.
- Tested and fixed bugs, as well as addressed coding issues.
- Collaborated with the engineering team to design and launch new features.

## AXA Partners, Solutions Developer     Mar 2019 – Jun 2020

- Implemented web applications using React, Spring Boot, JSF, and Hibernate.
- Extensive experience with MySQL development for RDBMS.
- Proficient in deploying apps on Application/Web servers like WebSphere and Tomcat in various environments.
- Collaborated closely with engineering and other teams.
- Worked with development teams and product managers to brainstorm software solutions.
- Developed and managed well-functioning databases and applications.
- Tested software for responsiveness and efficiency.

## CIMB Bank, Solutions Analyst                                    Apr 2018 – Mar 2019

- Implemented and enhanced new features for applications.
- Developed and supported web applications using Java, J2EE, and Spring MVC.
- Created single-page UI screens and resolved bugs in Angular applications.
- Designed database structures, proficient in SQL, and performed performance tuning.
- Designed and implemented REST APIs using the Spring framework.
- Worked in compliance with the full Software Development Life Cycle.

## MSIG Insurance, Software Engineer                               Mar 2016 – Apr 2018

- Implemented and enhanced new features for applications.
- Developed and supported web applications using Java, J2EE, and Struts MVC.
- Proficient in SQL and performance tuning.
- Worked in compliance with the full Software Development Life Cycle.

## Allianz Insurance, Software Engineer                            July 2013 – Dec 2016

- Developed web applications using Java, JSP, Zkoss, and Spring.
- Wrote clean, functional code for both front-end and back-end.
- Tested and fixed bugs and other coding issues.
- Participated in requirements gathering, design, analysis, development, and testing phases.
- Conducted unit testing, UAT, and provided production support.
- Created various PDF reports using iReport Designer.
- Implemented client-side validations using JavaScript.
